A., T. &. S. F. Time Card.

Under the new schedule in effect De cember 13, first train leaves Santa Fe at 3:55 p. m. connecting at Lamy with train No. 1 at 4:55 p. m. No. 1 carries local passengers between Lamy and Alerque, and west of Albuquerque to California, this train also connects at Lamy with train No. 17, and carries passengers for Albuquerque and points moneys du south, connection is also made on this run with the Chicago Limited castbound on Wednesdays and Saturdays, this train

arrives at Santa Fe at 7 p. m. Eastbound first train will leave Santa Fe at 9:40 p. m. returning arrive at Santa Fe at 11:45 p. m.; this train carries local passengers between El Paso and La Junta and has through sleepers to Kansas City; second train leaves Santa Fe at 12:15 a. m., this is a through train from California, and has through chap car and Pullman for Denver. Colorado Springs and Pueblo; No. 3 westbound California Limited leaves Santa Fe on Mondays and Friday at 8:50 a. m.; returning arrive at Santa Fe at 10:40; the Chicago and California Limitted trains will only run twice a week each way until further notice.

The Stranded Company.

They had a patent rain machine, and thunder they could make; A snow-box also they possessed that

took the cake; At their behest the breaking waves the hearers' ears bedinned; But still one element defied—they couldn't raise the wind,

The Birth of the "Greater" New York.

With the dawn of the new year the "Greater" New York is ushered into the world a full grown giant. The problem of municipal government is to be put to the supremest test. Within its limits is contained a population equal to that of 13 of our sovereign states at our last census, and as numerous as that of the original 13 states. Provisions for the life and health of this vast multitude of all nations and climes is an unsolved enigma. Thousands of sufferers in New York and elsewhere are wrested from the grasp of that agonizing complaint, rheumatism, by the timely use of Hostetter's Stomach Bitters, which is a preventive of malaria and kidney complaint, and curative of liver complaint, constinution and nervousness

A Chance to Pose. "How did Bilkins come to formulate a

plan for currency reform?"
"Oh, you see Bilkins is one of those men who have all the qualifications for public life except votes."

THE FLIGHT OF THE YEARS.

When one by one the silent stately years Glide like pale ghosts beyond our yearning

sight,
Vainly we stretch our arms to stay their flight,
So soon, so swift, they pass to endless night!
We hardly learn to name them,
To praise them or to flame them,
To know their shadowy faces,
Ere we see their empty places!
Only once the glad spring greets them,
Only once fair summer meets them,
Only once the autumn sloer.

Only once the autumn glory, Tells for them its mystic story. Only once the wintry heary
Wears for them its robes of light!
Years leave their work half done; like men

With sheaves ungathered to their graves the pass
And are forgotten. What they strive to do
Lives for awhile in memory of a few,
Then over all oblivion's waters flow—
The years are buried in the long ago!
—Julia C. R. Dorr.

JERRY'S CHOICE.

"Now, see here, Jerry," exclaimed Farmer Johnson to his man of all work "ye needn't git oneasy jest because old Podgers hez offered ye a dollar a month more'n I'm payin ye. I reckon I've got about ez much money an kin afford to pay ye about ez much ez Podgers kin or mebb a little more.

"Ye'r' a fust class worker, Jerry, I'l admit that, an I don't want ye to be gettin dissatisfied or thinkin of diggin out, so I'll make a bargain with ye right now before we go any further. If ye stick to me an work ez well ez ye've bin workin right along fer the next two years, I'll pay ye the same as Podgers offered ye, an at the end of the two years I'll give ye the best critter on the place. Yes, siree, Jerry, ye kin take yer pick of ary critter on the hull place, from a sheep up to a horse, or even a giraffe or elephant, if I happen to have one of 'em on hand when it comes time to take yer choice.

"I'll do it," answered Jerry Brant quietly, "and there's my hand to bind the

"What d'ye say to that, Jerry? Is it :

That's the way to talk; that's jes what I wanted to hear," exclaimed Farm-er Johnson, grasping Jerry's extended palm and giving it a hearty shake. "Now that biz'ness is settled satisfactory to all hands, an we kin pitch into the work with clear consciences.

No further mention was made of th bargain between Jerry and his employer until they were seated at the dinner table later in the day, and then Mr. Johnson with a merry twinkle in his eyes, glanced across the table at his better fraction and

"Well, mother, I had to discharge Jerry an hire hi a over ag'in today."
"You seem to be in very good humo about it, so I judge the difference couldn't have been very serious," commented Mrs. Johnson, who used to be a Yankee schoolma'am before she married, and therefore

did not handle the United States dialect

with the offhand familiarity of her hus-Serious? Ye kin bet it is!" ejaculated Mr. Johnson. "Why, I've got to pay him end of two years, if he stays right along, he's to have his pick out of the critters on the place to take along with him an keep for his own. I expect he'll take a horse, but I can't help it. I wasn't goin to let

old Podgers hire him away from me an then go around chucklin over it behind my back for the next six months."

"Mr. Podgers made an attempt to hire him, did ho?"

"Yes, an a purty nervy attempt at that. Offered him \$1 more a month, but I set-tled the matter in a hurry by pilin the best critter on the place on top of that. But if he stays the hull two years I reckon he'll earn it, eh, Jerry?" Jerry blushed, and answered that he would do his best.

"Didn't you exempt my pony, papa? I really can't think of allowing Mr. Brant to run off with that, even if he does car it!" exclaimed Farmer Johnson's pretty 18-year-old daughter May, with a side-long glance of admiration at Jerry's broad shoulders and manly features. noulders and manly features.
"Oh, Jerry wouldn't be mean enough

to take the pony, I guess," interposed her

"No," said Jerry, "I don't want the pony—unless the rider goes with it," he added, sotto voce. "Eh, what's that?" demanded Mr. John-son. "Unless what? I didn't ketch the

tail end of that remark exactly." "Jerry's face turned crimson, and he was about to repeat his remark when the quick witted young lady came to the res-

"Mr. Brant"-she always called him by that title, because she considered it more becoming and dignified than Jerry—"Mr.

Brant says he doesn't want the pony un-less the bridle goes with it, I believe," she explained ingenuously.

"Huh! I reckon a halter is all he'll get with her if he takes that pony. There wan't anything in the writin's about throwin in a bridle," said Farmer John-

"You needn't worry, father. I think

"You needn't worry, father. I think Mr. Brant will be generous enough to spare me my pony," said May reassuringly. "Yes, you may keep your pony," agreed Jerry, with an undisguised glance of admiration at the pretty face opposite him. May's eyes fell before his, but not until they had flashed back a look that caused his heart to beat high with hope.

The fact of the matter was that stalwart, good looking Jerry had long admired his employer's handsome and accomplished daughter, but today was the first time he had dered to let her know it either by look or speech. After that, however, their acquaintance rapidly ripened, and a few weeks later Jerry surprised Mr. Johnson by asking for the hand of his daughter in marriage.

daughter in marriage.

Mr. Johnson was engaged in the pastoral occupation of milking a cow at the moment this question was sprung upon him, and he nearly fell off the stool in astonish-

STAGE

STAGE

Want to marry my darter, May?" he gasped. "I guess not, young man! Not could if the court knows itself. I've bin edyercatin her fer suthin higher than marryin her father's hired man."

"Oh, if that is the only objection, it can easily be removed," interposed Jerry. "I don't expect to remain anybody's hired man after my two years are up. I believe I told you when I came here that I had just graduated from college and intended to make the pursuit of agriculture my life business instead of going into medicine or law or any other of the already over-crowded professions. I believe a man with brains can put them to as good use and make as much money in farming as in anything else, and I propose to prove it. I am studying the practical side of the business now, and at the end of my two years I propose to go west and buy a ranch and

strike out for myself. As far as my education is concerned, I don't think I shall ever give your daughter occasion to be ashamed of me, and as to supporting her comfortably and in becoming style, I be-lieve I shall be abundantly able to do so,

"Can't help that, Jerry!" broke in Mr. Johnson. "I hain't goin ter have ye lug gin May off jest because ye two young folks imagine ye'r' in love. A woman is a mighty queer an onsartin sort of errite anyhow, as real find out soon enough when ye git booked up in double harne-fer life with one of em, an if I was in yer place I wouldn't be in any harry bons takin a yoke of that kind on my shoulders

"Anyhow if ye insist on gittin married in spite of my warnin ye'll hafter pick out some other pardner besides the onye've got yer eyes sot on at present. My is goin back to college next week to finish up her edyercation, an when she gits through her schoolin it will be plenty time enough fer her to commence thinkin 'bout the men. She'll forgit ye by that time fast enough, so ye might as well give up all hope right now of ever gittin her. I like ye well enough other ways, Jerry, but I don't care fer ye in the role of sonin-law. There, now, ye've got yer answer fair an square, an if ye want to stay an work out the balance of yer time we'll drop the love bizness right here an I'll treat ye as well as ever. But if ye don't care to stay under the circumstances it is all right, an I shan't blame ye any fer goin. Now, which is it to be, Jerry, stay

or quit?"
"I'll stay," said Jerry quietly.
And stay he did, performing his duties as conscientiously and thoroughly as ever, although the farm life suddenly grew sordid and dull when May went back to her college studies.

The months rolled swiftly around, how ever, as months have a habit of doing, until 18 of them had been crossed off the calendar of time. Then May, as bright and winsome as of old, came home with her dimples and diploma, and, though he did not even dare to look his admiration, Jerry was straightway transported to para

Jerry's term of service finally expired, and he regretfully announced that the time had come for him to strike out in life for himself.

"That's so, Jerry," said Farmer John-on. "I had clean forgot bout yet two years bein up today. Waal, I'll look over accounts an settle up with yeafter dinner. an in the meantime ye kin be lookin round an sorter makin up yer mind which one of the critters on the place ye want. I believe ye was to take yer choice when ye quit

"Well," said Jerry promptly, "it won't take me long to make up my mind.

Here he stepped quickly across the room to where May was gazing disconsolately from the window and whispered a question in her ear. For an instant her eyes Then she rose with a smile, placed her hand confidingly in his and to gether they faced her father.

"This is my first and only choice." ex claimed Jerry, with a ring of mingled pride and triumph in his tones. "But ye can't do that—'tain't in the

I said critter, not wimmen folks, an I hain't goin to allow no such"-"Just a moment, if you please, Mr. Johnson," interrupted Jerry Brant, drawing himself erect, with proudly flashing eyes and still retaining May's hand, "Haven't I heard you allude to the women as queer critters, consarned critters, plaguey critters, and I don't know how many other kinds of critters during the past two years and unward that I have been with you?"

"Yes, I s'pose ye have," acknowledged Mr. Johnson, "but—er"— "All right, sir," interposed Jerry briskly. "You promised me the best critter on the place, and this is the one I want, and

the only one. Farmer Johnson gazed at the handsom and smiling young couple before him in a half indignant, half indulgent sort of way for a moment, and then the latter feeling

got the better of the struggle and he quietly remarked: waa, a bargam is a bargam, an a spose I'll hafter keep my word. But I say, young man," and Mr. Johnson's eyes twinkled mischievously, "don't ye think ye sorter missed yer vocation, not bein a lawyer instead of a farmer?"—Will S. Gridley in Chicago Record.

Little Edgar's Discovery.

"Jia, ha, ha! Ho, ho, ho! By George!" howled Henry Dustling as he patted his little son's curly head. "You're a great boy! Let me kiss you! Oh, say, you know more than some grown folks do now. Ha, ha, ha! Best joke I ever heard, 'pon my

Little Edgar looked up in childish wonderment for a moment, and then he also began to laugh and clap his chubby hands began to laugh and clap his church mands.

Henry Dustling held a magazine open at a page upon which was pictured an old woman who wore spectacles and had a double chin. The father looked down at the picture again and emitted another roar of happiness, which brought his wife and her mother to the scene.

"What on earth is it that is causing you to make an idlot of yourself?" exclaimed his mother-in-law, while his wife tried to take the child out of his arms, fearing that he had suddenly lost his reason.

Then little Edgar pointed down at the picture in the magazine and said:

"Dat's gamma The two ladies looked first at the picture and then at Henry Dustling, but he said nothing. He had become perfectly sober, and putting the little boy down upon the floor he sidled out of the room, steadily gazing into the eyes of his mother-in-lav as a lion tamer gazes into the eyes of the king of beasts while backing out of the

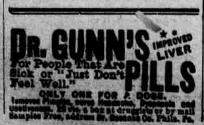

Mrs. Dustling's mother was only 49 and was in many respects still a young woman.—Cleveland Leader.

The World's Tastes In Diamonds.

Of course there is taste in diamonds. Countries like England, France, the United States and Russia take all varieties, but these are mainly the fields for the best, the finest bluish white crystals. Precious stones are a measure of opulence Precious stones are a measure of opulency and the growth of fashion. The Americans imported \$120,000,000 worth in 24 years, but of these \$90,000,000 were in the latter half of the period. In the year 1889 they bought ten times as many as in 1869. The gems range in color from bluish and nearly pure white to blue, pink, yellow, period great and brown, while some are orange, green and brown, while some are opaque. Ta-se has decided that the stones are most precious that are most translucent and brilliant. The largest diamond ever met with was found in Brazil, and an en-

thusinst valued it, by weight alone, at £224,000,000. But it was black and not brilliant. The estimates gradually sank to £400,000, and today it would probably not fetch nearly so much as the most modest count. Colored specimens do best in South America and the cast.—Kimberley Letter

to London Telegraph. Insinuation. "Last night I dreamed I was dead."
That was a hot one, wasn't it?"

is a vacuum that can only be filled by a child. In America there are too many childless homes. All the love and passion of courtiship and all the honeymoon turn to bitter dust more than the bitter dust more than the bitter dust more than the boneymoon turn to be the boneymoon

the lips of the wedded couple to whose home there never comes the patter of childish feet.

One cause, more than any other, con-tributes to making the tens of thousands of childless, and consequently unhappy, homes all over this country. The cause is often the unconscious fault of the wife. A woman who suffers from weakness and dis-ease of the distinctly feminine organism is unfitted for motherhood, and if she has children it will probably be at the sacrifice of her own life. Dr. Pierce's Favoris Dechildren it will probably be at the sacrifice of her own life. Dr. Pierce's Favorite Prescription is a wonderful medicine for women who suffer in this way. It acts directly on the delicate and important organs concerned in wifehood and motherhood. It cerned in wifehood and motherhood. It makes them strong, healthy, vigorous, virile and elastic. It banishes the squeamishness of the expectant period and makes baby's advent easy and almost painless. It insures the little new-comer's health and a bountiful supply of nourishment. Thousands of homes that were childless and unhappy now echo with the prattle of healthy babyhood, as the result of the use of this marvelous medicine. of this marvelous medicine

of this marvelous medicine.

"When I began taking Dr. Pierce's medicines I was very sick." writes Mrs. R. D. Moore, of Schuyler, Colfax Co. Nebr., (Box 173). "I could not keep anything on my stomach, and kept getting worse. My husband got me two bottles of Dr. Pierce's Golden Medical Discovery, two of his 'Favorite Prescription' and four of his 'Pleasant Pellets.' (At this time I had been pregnant about two months.) I began taking the medicines, and in less than a week I could eat anything. The 'Favorite Prescription' is the best medicine in the world for prospective mothers. My health is better now than it has been for twelve years. My little girl is now six months old and is well and healthy. I do not think I should have had my baby if we had not obtained something to build up my system and strengthen me."

GOOD FOR INSOMNIA.

The Kansas Man Who Took an Odd Dose In the Dark.

A Topeka man was recently troubled with insomnia. He thought that some young medical student would be glad to take his case for the practice there was in it and a small fee, if any. He sought out a medical student who seemed to have the

proper appearance and laid his case before him. "I think his prescription will be just what you need," said the coming practitioner; "three at a dose."

'Pills?' queried the invalid. "Yes, but just the kind you need."
"How often shall I take them?"

"When you feel as if you needed them. The patient took the prescription to a nearby drug store and had it filled. The pills were placed in a small box and wrap-ped up. The man took them home and absentmindedly tossed them on top of the bureau. He went to bed that night forgetting all about his ailments and the pills. He was unable to sleep, and thought that perhaps the pills would bring Mor pheus to his rescue. He got up in the dark, groped around for the box, found it, unwrapped it and was surprised to find but three pills. He took them and returned to bed and was asleep in a few

He met the young student on the street the next day and told him of the wonderful effect that his remedy had produced. The young hopeful was quite elated over his success. The man returned home that night. During the evening's conversation his wife asked him if he had seen anything of a box of collar buttons that she had purchased the day before. "I put them on top of the bureau," she said, "but the box has been opened and they are gone."-- Topeka State Journal.

"The landlord called today. So I gave him the rent and showed him the baby." "Why didn't you show him the rent and give him the baby?"—Punch.

Getting In Shape

The landlady began to get worried. By the way things were going there wouldn't be enough left to make hash the next morning. Well, she was glad that Thanks giving came only once a year. But the ple! Alas, it was all gone but one piece, and the pale haired young man with the vellow face had done it all.

As for him, the expression on his face

lady.
"Five mines pies," murmured the young man. "Oh, the dreams that I shall have tonight! Tomorrow I ought to be able to write five poems and one slum

story."
This, then, was the secret of Stephen Crane's success. — New York Journal.

A Difficult Problem "What makes you so thoughtful, Bilton? What's on your mind?' "I was thinking of the Jersey Lily's ca-

"But, man alive, you haven't been in a brown study all the afternoon over that woman, have you?"

OUR GLORIOUS CLIMATE.

Santa Fe Enjoys a Most Equable and Cool Summer Temperature and

Only Ten Per Cent of Cloudy Days Per Annum in This Favored Locality-Sunshine Nearly All the Time.

New Mexico lies at the point where the Booky mountains lose that characteristic individuality which they have preserved as a distinctive feature from within the Arctic circle to Colorado and almost throughout that state. Heretofore they have been a range or a broad series of parallel ranges exhibiting lofty peaks and passes at altitudes so great as to lie further skyward than many vanuted al-pine summits. But when the chain has eached its final great effort of elvation in Pike's Peak it rapidly loses its massive character and with astonishing rapidity sinks to rolling hills and spreads out on nesas of altitude still great but of even

and gentle slope.

Viewed by the aid of its contours of altitude New Mexico appears as a plain raised to the height of 5,000 feet, broken but by two systems of greater elevations and interrupted by lesser ones only on the eastern and southern faces. Nearly three-fourths of the territory is in-cluded within the contour of 5,000 feet. All that part of the territory which lies above the 7,000 feet con tour is rugged mountains of precipitous slope and desply scored face. Their climatic purpose is to extract the rain from the atmosphere for the benefit of the lower levels; they do more than this, for the rain carries away the desintegrating rock to enrich the plateau and the valley beneath. Arizona faces the prevailing humid wind and opposes to it a flight of steps; New Mexico is almost entirely on the leeward side of the mountain ranges and exposes a minimum of bluff surface to the wind. Hence arise different oli-

matic conditions.

The elevation of the barometer distern of the weather bureau station at Santa Fe is 6.998 above mean tide of the Gulf of Mexico, and the barometer is 31 feet above the base of the monument in the main plaza, so that the altitude of Santa Fe is

approximately 6,967 feet above sea level.
A resume of the records for 23 years shows that great extremes in temperature are seldom reached, the lowest recorded temperature being 13 degrees below zero in January, 1883, and the highest 96 in July, 1878, in Santa Fe.

During the present decade the highest absolute temperature has not exceeded 90 degrees, and in a comparison of these temperatures with extremes of the more humid sections of the eastern states and the Mississippi valley the extreme dry-ness of the air must be considered; that the heat experienced by the human body shown by the metallic thermometer, a temperature of 90 degrees in the shade at Santa Fe being about equal to 78 degrees in St. Louis.

The following table taken from the reports of the climate and crop service of the bureau will give a general idea of the relative intensity of heat as indicated by the metallic thermometer.

Stations.	1.00 0000000000000000000000000000000000				
	8 a. m.		8 p. m.		
	Absolute.	Sensible.	Absolute.	Sensible.	Mean Relative Humidity.
Boston Buffalo Chicago Cincinnati Denver Des Moines Detroit Galveston Mansas City Memphis New Orleans New Orleans New York. Philadelphia. St. Louis San Francisco Santa Fe Washington.	60 59 57 60 51 53 56 78 58 74 61 61 61 64 61 64	56 54 53 56 46 51 53 74 55 61 71 58 58 54 47 60	62 63 69 67 63 61 81 81 77 77 65 68 79 66 68	58 56 56 57 56 57 56 66 72 60 61 63 56 63	79 71 72 70 57 77 78 76 78 66 79 80 72 77 81

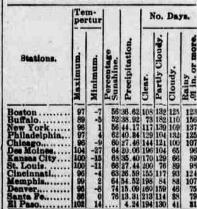

It will be observed that the difference is less than that given in comparison first above noted. This demonstrates the decrease in the difference between the absolute and sensible temperature as the intensity in heat becomes less, until in midwinter, the difference is slight and ow temperatures are therefore fairly comparable.

The thermal conditions, especially in

summer, are not what might be expected at this latitude, owing to the environment. The average temperature during the summer months is about 67 degrees, about the temperature of the upper lake region, while in winter it is about the same as that of the Ohio valley. is much cooler in summer than any other point, (covered by the records bureau.) in the same latitude in the United States and cooler than most stations with a latitude of less than 41 to 42 degrees. It is the extreme southern point of the

ool region of the United States." The following table shows the annua extremes in temperature, rainy days, the perceptage of sunshine and number of a tive of the different sections of our coun

FROM ANNUAL SUMMABIES, 1894.

Santa Fe excels not only in sunshine and number of cloudless days, but that her climate is more equable than others given in the table—the annual range of temperature being 89 degrees. There is a greater disparity in sunshine also than would appear from the figures given in that the monthly percentages of the Mississippi valley states, notably St. Louis, the largest percentages of sunshine occurred during the summer months, when it is not such a great desideratum, while at Santa Fe, the greatest monthly percentage, (91) occurred in November.

The average number hours of sunshine at Santa Fe every day for a period of five Santa Fe excels not only in sunshine and at Sants Fe every day for a period of five years is 7.8—a record not excelled any-where in the United States so far as the records of the weather bureau show.
